

DR. ALICE DRAGOMIR

Professeure agrégée, Faculté de pharmacie, Université de Montréal
Professeur associé, Faculté de Médecine, Chirurgie, Urology, McGill University
Directrice du Réseau québécois de recherche sur les médicaments - Réseau thématique de FRQS

PRESENTATION TITLE: Drug Research : pre-clinical and post marketing considerations.

BIOGRAPHY: Dr. Dragomir is an Associate Professor at Faculty of pharmacy of Université de Montréal since august 2022. Between 2012-2022 she was Associate Professor at McGill University at the Faculty of Medicine, and a Scientist in health economics and outcomes research at the Research Institute of the McGill University Health Center. She received *Chercheur boursier FRQS Junior 1 and 2*. Dr. Dragomir is a health economist and biostatistician with master degree in statistics and doctoral degree in pharmacoepidemiology and pharmacoeconomics, from University of Montreal, Canada. She has 20 years of experience in academic research and she was involved in research projects focused on evaluation of health outcomes and health economics related to different treatment strategies, adherence to treatments, health services utilization and disease modeling in several fields, such as: hypertension, dyslipidemia, cardiovascular diseases, osteoporosis, mental health diseases, and cancers. Her current research is focused on clinical and economic evaluation of different treatments strategies offered to patients with urological cancers. She is an economic lead for economic evaluations for CADTH since 2015, and the Director of Quebec Network on Drug Research since May 2022. She has an extended experience in analyzing administrative healthcare databases, such as RAMQ and Med-Echo. Her research represents a valuable tool for decision-makers and clinician leaders when evaluating the clinical and economic impacts of innovative treatments.
