JOSH POTTEL, PhD
President and CEO
Molecular Forecaster Inc.
Distinguished DDTP Alumnus

BIOGRAPHY: Josh Pottel is President and CEO of Molecular Forecaster. He completed his B.Sc. in chemistry at McGill University in 2011 along with a minor in computer science. Under the supervision of Nicolas Moitessier, he obtained his Ph.D. from McGill, focusing his research on software development in chemo- and bioinformatics. He conducted postdoctoral research as an NRSA and CERSI fellow at UCSF with Dr. Brian Shoichet applying computational techniques to a variety of problems. In his academic career, he has received the DDTP fellowship along with provincial and federal prizes from the Quebec, Canadian, and American governments. He has authored over a dozen peer-reviewed publications and is a co-inventor of the VIRTUAL CHEMIST platform.
